COMPANY PROFILE

COSMOS FILTERS are premium high performance filters for automotive, Off Road & Industrial applications. COSMOS Filters are designed for optimum efficiency in today's low emission engines & stationary equipment, to provide superior protection to engine components, in all weather conditions. COSMOS Filters are manufactured worldwide to precise specifications of Original Equipment Manufacturers specifications & recommendations – Mercedes, Volvo, Scania, MAN & Toyota, Hyundai.

TECHNICAL SERVICES, QUALITY ASSURANCE & LOGISTICS

COSMOS Filters are equipped with latest technologies with fully automated process controls which guarantee accuracy and precision of the products, supply chain control & worker safety contribute to a green environment. Strategically located with easy access to various UAE ports, that enables us to provide better service to our clients. COSMOS has a best in class program for enhanced storage and handling of products, to deliver measurable logistical results. All products are stored in clean dust free environment for easy dispensing & convenient access to delivery points.

HEALTH SAFETY & ENVIRONMENT

COSMOS FILTERS incorporates safety & environment criteria throughout the activity cycle, ensuring proactive risk management, minimizing the impact of operations on the environment. Meeting the compliance requirements at each location taking into account legislative trends & international standards to contribute to sustainable environment. All necessary skills are provided to employees to execute their duties prioritising environment along with operational efficiencies.

TECHNOLOGY CENTRE & ACADEMY

COSMOS FILTER has a hi-tech quality control laboratory for testing products with superior blending techniques and is manned by experienced & qualified personnel. The company has latest technology testing equipment to fulfil the quality of high-performance products. Our products always exceed customer expectations. We keep control of stock quantities, capacity of the machines, equipment and manpower in order to honour efficient delivery schedules.

CUSTOMER SERVICES:

COSMOS FILTER is committed to providing its customers with comprehensive lubrication solutions that suit their needs. Our management philosophy is rooted in our aim of providing maximum customer satisfaction through the continuous improvement in quality, distribution channels & all organizational processes. Innovative perspectives are adopted to encourage new ideas, enabling us to grow into one of the leading exporters of Automotive, Industrial lubricants and other specialty products. Our dynamic and skilled workforce continually contributes towards ensuring maximum customer satisfaction.

OIL FILTERS

COSMOS Heavy Duty Oil Filters protect your engine, removing contaminants from the oil, ensuring efficient operations for Gasoline and diesel engines.

- High-capacity filter media for extended oil life
- Anti-drain back valve to prevent dry starts
- Heavy-duty construction for extreme conditions
- Reducing wear

FUEL FILTERS

COSMOS Fuel Filters ensures clean fuel delivery to your engine by removing dirt, rust, and other impurities from the fuel system.

- Advanced filtration technology for maximum efficiency
- Corrosion-resistant housing
- Compatible with biofuel and diesel blends
- Applications: Diesel engines, gasoline engines, and hybrid vehicles

AIR FILTERS

COSMOS Air Filters protect Designed to trap dust, dirt, and debris before they enter your engine, ensuring clean airflow and optimal combustion.

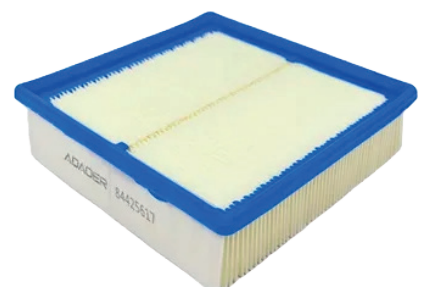

- High-efficiency filtration media
- Durable construction for extended service life
- Compatible with a wide range of vehicle makes and models
- Passenger cars, trucks, SUVs, and commercial vehicles

CABIN FILTERS

COSMOS Cabin Filter Provides clean, fresh air inside your vehicle by filtering out pollen, dust, allergens, and harmful pollutants.

- Activated carbon layer for odor reduction
- Multi-layer filtration for superior air quality
- Easy to install and replace
- All vehicle types, including electric and hybrid models
